About the Council for Aid to Education

The Council for Aid to Education, Inc., is a tax-exempt, not-for-profit corporation dedicated to promoting an effective partnership between business and education in the task of improving America's educational system.

Founded in 1952 by the chairmen of Standard Oil Company of New Jersey (Exxon), General Motors, and U.S. Steel (USX Corporation), the Council was originally designed to encourage private-sector support of higher education. Today the Council has expanded its mission to include primary and secondary education and to encourage more effective — not simply greater — corporate support of education. Its job is to help ensure that business investments in education produce results.

The Council is supported in the main by business, as well as originally and again recently by foundations. Working directly with business to target key areas of educational concern, the Council helps point corporations toward the issues and opportunities in which they have a compelling interest and on which they can have an impact. It alerts them to emerging educational challenges and their strategic implications. It provides information on promising approaches to educational improvement. And it offers detailed advice on how to make effective contributions to the quality of American education.

The Council's current agenda of research, consulting, publication, and advertising has been shaped by the corporate community's recognition that education has to assume as important a place in company planning as production, marketing, and research — but that education is often an area where corporations lack the experience necessary to ensure a full return on their investments. The Council stands ready to extend expert assistance to corporations in all their education-support efforts.

Foreword

Several changes mark this 31st edition of Voluntary Support of Education, changes designed to make the report more useful to educational institutions and funding sources alike.

- In the National Estimates section, trends in giving to higher education in relation to enrollment and expenditures are now reported for four-year and two-year institutions separately. Given the large differences in support, enrollment and expenditures for these two types of higher education institutions, a more meaningful picture of support for each group emerges when each is viewed separately.
- Annual survey results are placed more clearly in their historical contexts. The report now includes more charts showing trends over time.
- Aggregate public/private comparisons (e.g., average support per institution for all four-year public and all four-year private institutions) have largely been eliminated. Such comparisons can lead to misunderstandings because the mix of institutional categories (research/doctoral, comprehensive, etc.) on the public and private sides greatly differ. Public/private comparisons are better made only within a given institutional category, and even then cautiously because of the wide range of institutions existing within categories.
- The report is now published in two volumes: Volume 1 — ***National Estimates and Survey Summary*** contains an extensive analysis of the results of the year's survey in a multi-decade context. Volume 1, which contains no institution-specific information, is distributed on a complimentary basis to all survey participants, to other institutions that are being encouraged to begin participating in the survey, and to a large number of companies and foundations.

  Volume 2 — ***Detailed Survey Results by Institution*** contains extensive information on the amounts and types of voluntary support received by each college, university, and elementary and secondary school participating in the survey. Volume 2 is available from the Council for Aid to Education at $35 prepaid per copy for survey participants and $50 prepaid per copy for all others. (A copy of Volume 1 is always included with a purchase of Volume 2.) Volume 2 is being mailed this year on a complimentary basis to institutions being encouraged to begin participating in the survey. It is always mailed on a complimentary basis to Council corporate and foundation supporters.
- The detailed, institution-specific information presented in Volume 2 is a small portion of all the information provided by each institution. All information is available from the Council for Aid to Education on machine-readable media. In addition, the Council maintains a database of higher education voluntary support survey information covering the years from 1969 forward. Queries regarding the purchase of these data should be directed to the Council.

Changes in the annual survey process and the content of the report will continue over the next several years. In particular, the elementary/secondary sections of Volume 1 will undergo a full revision next year. The Council welcomes comments on changes described above or suggestions for additional changes. Please address comments and suggestions to David R. Morgan, Director of Research.

The Sponsoring Institutions

The Council for Aid to Education, Inc. is a not-for-profit corporation dedicated to promoting an effective partnership between business and education in the task of improving America's educational system. Based in New York City and funded by contributions from business and foundations, the Council works directly with business to target key areas of educational concern, identify opportunities for corporate involvement in education, and provide detailed advice on how to conduct effective programs in support of education. The Council's activities include research, consulting, publishing, and conducting workshops and seminars.

The Council for Advancement and Support of Education (CASE) is a professional educational association with 2,850 institutional members which offers programs of professional development and acts as a public affairs arm for U.S. education. Participants in its programs include fundraisers, alumni administrators, communicators, government relations officers, and the managers of these functions in postsecondary and secondary institutions. CASE is headquartered in Washington, DC.

The National Association of Independent Schools (NAIS), Boston, is a nonprofit voluntary membership association of nearly 1,000 schools in the U.S. and overseas serving a total enrollment of 355,000 students. Its administrative and academic services to member schools include research reports, periodicals, and manuals; an employment clearinghouse for school administrators; and leadership and professional development for teachers, administrators, and school trustees.

1990 National Estimates

Higher Education

Voluntary Support Overall

▬ Voluntary support of higher education climbed an estimated $875 million for the academic year ending June 1990, from $8.925 billion in 1989 to $9.8 billion (Table 1 and Figure 1).

- The significant discontinuity of the 1980s appears to be the surge in support in 1986 and 1987 rather than the drop in 1988.

▬ The $875 million increase represents a rise of 10 percent. Support rose 9 percent in 1989.

- In constant 1990 dollars as deflated by the Consumer Price Index, the increase was 5 percent. If deflated using the Higher Education Price Index, which better reflects the typical market basket of goods and services purchased by higher education institutions, the gain was 4 percent.
- Since 1985, support in current dollars has grown 55 percent, close to three times as much as the Consumer Price Index (up 20 percent) and twice as much as the Higher Education Price Index (up 28 percent since 1985).

▬ Voluntary support clearly responds to economic trends (Figure 2):

- As the Gross National Product (GNP) increases, so eventually does voluntary support.
- But the performance of the stock market (measured by the New York Stock Exchange Index) is a better short-term predictor of voluntary support. The dips

Higher Education (HEPI)*	78	94	100	6	28	

** HEPI (Higher Education Price Index) source: Research Associates of Washington* and rises of the stock exchange tend to be mirrored by voluntary support within a year.

- The relationship of voluntary support to economic trends becomes clearer if gifts for current operations and capital purposes are viewed separately.

Current Operations vs. Capital Purposes

▬ Support for current operations was up 8 percent, about the same as in 1989 (Table 1). In constant 1990 dollars the increase was 3 percent. Note that there was no drop in 1988 when support overall declined (Figure 3).

- Over the past thirty years, gifts for current operations have climbed almost every year. Support for current operations generally follows Gross National Product (Figure 4), but a recession does not always mean a drop in support. Without necessarily implying any causal relationship, GNP is a good predictor of gifts for current operations.

▬ Support for capital purposes (buildings and equipment, endowment, retirement of debt), which is often provided in the form of large gifts of appreciated property (particularly securities), rose 12 percent in 1990 (Table 1). In constant 1990 dollars, the increase was 7 percent.

- The 1990 increase in gifts for capital purposes, which is where the 1986 and 1987 surge and the 1988 drop were most strongly felt (in part because of anticipated tax reform), comes on top of 1989's 10 percent increase (Figure 5).
- Without necessarily implying a causal relationship, stock market performance is a good predictor of gifts for capital purposes. Individuals are responsible for the majority of capital purposes gifts.

Sources of Support

▬ Voluntary support trends are also clarified if support is broken down by major donor groups (Table 1 and Figure 6, over):

- Alumni donations were up by 11 percent in 1990 (versus 12 percent in 1989) and accounted for 26% of the year's total support. In constant 1990 dollars the increase was 6 percent.
- Non-alumni individual donations were up by 7.5 percent (versus 8 percent in 1989) and accounted for 23 percent of all support. In constant dollars the increase was 2.5 percent.
- Together, alumni and non-alumni individuals (the sources of half of all voluntary support) gave 9 percent more than in 1989.

Figure 3

Changes in Estimated Support for Current Operations in Relation to GNP

Percent increase over 1961 amount (constant $)

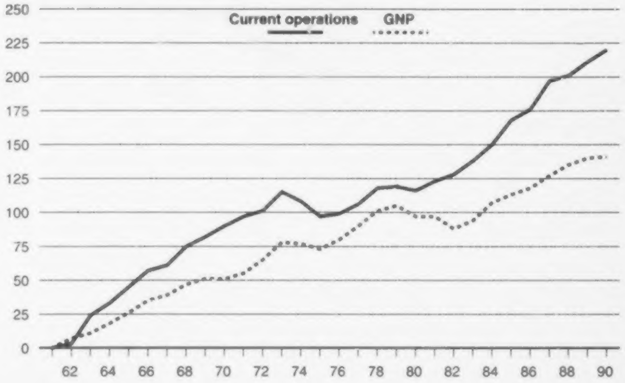

Figure 5

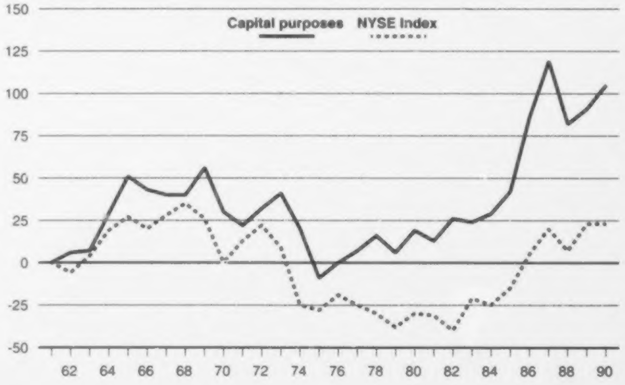
Changes in Estimated Support for Capital Purposes in Relation to the NYSE Index

Percent increase over 1961 amount (constant $)



- Also contributing to the overall rise, corporations (the third-ranking donor category at 22 percent of the total) increased their support of higher education by 11 percent in 1990, bettering the previous year's 5 percent increase — and this despite mixed corporate profits. The 1990 estimated corporate total of $2.17 billion establishes a new high for corporate giving.
  - — Until the late 1970s, corporate support followed corporate pretax income (PTI) rather closely, staying below 1 percent of PTI. However, corporate contributions have risen dramatically since then while PTI has languished (Figure 7). Since 1982, corporate contributions to all causes have ranged between 1.7 and 2.2 percent of PTI, unprecedented levels. These figures reflect more than an increased corporate commitment to education and other social causes.
  - — During the 1980s, there was dramatic growth in losses reported by companies operating at a deficit. For instance, operating losses were $58 billion in 1980 and $137 billion in 1987 (the latest year for which data are available).
  - — The 1987 PTI figure of $275 billion is, then, the net of a positive $412 billion reported by profitable companies less $137 billion in losses reported by companies operating at a deficit.
  - — If the deficit figures are backed out of the PTI figures for the 1980s, the ratio of contributions to PTI drops to around 1.25 percent, still a significant increase over the pre-1980 historical level and probably a better indicator of the increased corporate commitment to all social causes, including education, which receives the largest share.
- Foundation giving, estimated at $1.92 billion, rose 10 percent and constituted almost 20 percent of contributions to higher education — a share that has been growing now for two years after several years of decline. The sensitivity of foundation giving to stock market performance is evident in Figure 8.
- Donations from religious organizations (included in the "Other Organizations" category in Figure 6), after a hefty 20 percent increase in 1989, rose by only one percent, and giving by "other" organizations (clubs, unions, fund-raising consortia, etc.) climbed 11 percent. Religious and other organizations together accounted for about 9 percent of total voluntary support.

Alumni Giving Projections

■ Along with national economic trends, the surge in higher education enrollment — and the subsequent growth of the alumni pool — that began in the early 1950s and continued through the late 1970s has also had a major impact on voluntary support. (The following pertains to four-year institutions only.)

- Enrollment (full and part-time) grew 147 percent from 1961 to 1990. By the year 2010 it will only grow another 21 percent of the 1961 amount.
- At the same time, the alumni pool grew about 200 percent from 1961 to just 1984. And by 2010 it will have grown 4 and a half times the 1961 amount.
- Put another way, in 1961 there were 2.4 alumni for every enrolled student. A low was reached in the late 1960s of only 1.9 alumni for every student. Since then the ratio has climbed to 3.5 and by 2010 the ratio will approach 5 alumni per student (Figure 9).
- While the alumni pool was rapidly expanding with the influx of young graduates, the average age of the pool was being driven down. In fact, between 1950 and 1975 the average number of years since graduation is estimated to have hovered between 16 and 17 years (Figure 10). However, since 1977 the average age has begun to creep up and now stands at 18 years since graduation. By 2010, it is estimated to reach 23 years since graduation. More and more of the alumni pool will be at an age where there is a greater tendency to give and to give larger amounts.
- The significant growth in total alumni giving (constant dollars) over the past 40 years is largely a function of the expanding alumni base (Figure 11). The average gift per alumnus (constant dollars) has changed little. But this is to be expected given the fairly level age factor and the poor performance of the stock market.

■ Flat enrollments and a growing and maturing alumni pool would together seem to bode well for alumni contributions in the years ahead.

■ These alumni projections are based on a report prepared for the Council by Professor Ralph Bristol, an economist at the University of New Hampshire. (Copies are available from the Council at $10 prepaid to cover duplicating, shipping and handling.) Professor Bristol is currently developing for the Council a methodology for individual institutions to use to make their own alumni giving projections.

Giving Patterns for Different Types of Institutions

■ The figures presented so far have concerned higher education viewed in the aggregate (except for the section above on alumni giving projections, which concerned just four-year institutions). As colleges and universities well know, these aggregate trends do not always obtain for all types of institutions or for all institutions within a given type of institution.

- The Council has not in the past estimated total giving for each type of higher education institution that it tracks through the annual Voluntary Support of Education survey (public and private research/doctoral universities, comprehensive universities, liberal arts colleges, and the rest).
- As part of a three year project initiated in late 1990 to enhance all aspects of the survey, the Council will begin publishing national estimates by type of institution in next year's report (where participation rates are sufficient to allow reliable estimates). As a step in that direction, separate estimates for four- and two-year institutions are presented below.

■ Four-year institutions:

- Total expenditures, both capital and operating outlays, are estimated to have been $122.9 billion in the 1990 academic year (based on Department of Education figures), an increase of 5 percent over the previous year and one of the smallest year-to-year increases since at least 1971 (see Table 2a).

Table 2a

Four-Year Institutions: Voluntary Support in Relation to Enrollment, Inflation, and Expenditures

* *Source: Department of Education (full- and part-time, not FTE).*

** *Derived from Department of Education figures.*

- Expenditures per student, adjusted for inflation, were unchanged from the previous year.
- Voluntary support per student stood at $929 (constant 1990 dollars) in 1971. It fell to a low of $747 in 1976, but has been climbing since and currently stands at $1,157.
- After reaching a low of 6.3 percent in 1975, voluntary support as a percent of expenditures has been generally moving upward and currently stands at 7.7 percent.
- Voluntary support should continue to grow as a percentage of expenditures, given flat enrollments and the expected increase in giving from at least alumni.

■ Two-year institutions:

- Total expenditures, both capital and operating outlays, are estimated to have been $20.3 billion in the 1990 academic year (based on Department of Education figures), an increase of 5 percent over the previous year and one of the smallest year-to-year increases since at least 1971 (see Table 2b).
- Expenditures per student, adjusted for inflation, were unchanged from the previous year.
- Voluntary support per student is estimated to have been $55 (constant 1990 dollars) in 1971. It fell to a low of $29 in 1981, but has been climbing since and currently stands at $62. These estimates should be considered quite tentative given the low participation rate of two-year institutions in the survey.

Table 2b

Two-Year Institutions: Voluntary Support in Relation to Enrollment, Inflation, and Expenditures

			Institutional Expenditures			Estimated Voluntary Support

* *Source: Department of Education (full- and part-time, not FTE).*

** *Source: Derived from Department of Education figures.*

- After reaching a low of 0.8 percent in 1975, support as a percent of expenditures has been climbing steadily and currently stands at 1.5 percent.

Future Trends

▬ Voluntary support of higher education is likely to show continued moderate growth in constant dollar terms, providing there is no severe, broad-based economic downturn.

- Anecdotal reports to the Council from the field indicate that the current recession has had a negative effect on the 1990-91 fund-raising effort at some institutions. The extent of this negative effect, and its duration, are currently unknown.

▬ Given increased competition for voluntary support dollars from other sectors of the non-profit community, yearly constant dollar growth will probably average in the 3–5 percent range.

- A return to the double-digit surges experienced during the 1980s should not be expected until perhaps the stock market has undergone another sustained climb.

▬ What does appear likely and worthy of continued attention is the increasing competition among different types of educational institutions (public and private, research/doctoral, comprehensive, and others) for support from the different categories of donors (individuals, corporations, foundations, and the rest).

- As we suggested in last year's report, educational institutions will define their missions more precisely and sharpen the focus of their appeals.
- Donors will likewise clarify their missions and more narrowly focus their support.
- In the Survey Results section that follows, this report presents these patterns in greater detail than past reports.

Elementary and Secondary Education

As the Voluntary Support of Education survey expands over the next three years to cover all sectors of education in the U.S., and if participation is sufficient, this National Estimates section will expand to cover giving to public and private elementary and secondary schools.

Technical Note on National Estimates

The national estimates of giving to higher education set forth on the preceding pages were derived from responses to the annual Survey of Voluntary Support of Education conducted by the Council for Aid to Education. Details on participation rates are contained in the Technical Note at the end of this report.

1990 Survey Results and Twenty Year Review

Higher Education

Who Received the Support

- Figures 12 through 16 show 20-year trends in total voluntary support per student *in constant 1990 dollars* for each type of institution. Please note where trend lines are based on few institutions. In all cases bear in mind that there can be great variation within each of the public and private institutional types.
- Table 3 (over) compares total voluntary support received by each type of institution over the past two years.
- The unnumbered tables on pages 10-11 show the top twenty recipients of support from the major source groups.

NOTE: Figures 12-16 are in constant 1990 dollars.

Who Gave the Support

- Contributions from almost all sources rose substantially in 1990. Table 4 presents 1990 survey results in comparison to 1989. Since no single source group accounts for a preponderance of support and since different source groups are subject to different economic and other influences, stability is built into the annual support stream.

- Table 5 shows the allocation of support from the different source groups to the different types of institutions.

Table 4

(Figures in parentheses show percent of total in each column.)

Table 8 displays, for each type of institution, per student support received from each source for each purpose. By putting its own voluntary support results on a per student basis, any institution can compare its pattern of voluntary support to the norms for its institutional type presented in this table.

Special Forms of Giving

The Voluntary Support of Education survey collects data on special forms of giving and tracks them over time. Included are bequests and deferred gifts from individuals, matching gifts from corporations, and noncash gifts from both businesses and other sources.

Bequests. The proportion of contributions in the form of bequests varies randomly over time, staying within the range of 20-25 percent of total individual giving. Table 9 presents data for the last decade. Appendix Table A contains more detailed information on bequests by type of institution.

Table 9

Bequests and Deferred Gifts, 1981 to 1990

(thousands of dollars)

Year	All Individual Gifts	Bequests	Deferred Gifts
1980–81	$1,611,232	$374,054 (23.2)	$103,153 (6.4)
1981–82	1,968,408	529,119 (26.9)	125,632 (6.4)
1982–83	2,054,133	437,961 (21.3)	154,508 (7.5)
1983–84	2,184,020	512,960 (23.5)	83,169 (3.8)
1984–85	2,411,244	485,000 (20.1)	194,028 (8.0)
1985–86	3,074,469	714,082 (23.2)	244,583 (8.0)
1986–87	3,795,699	756,795 (19.9)	425,297 (11.2)
1987–88	3,409,517	860,398 (25.2)	261,621 (7.7)
1988–89	3,570,299	787,750 (22.1)	387,272 (10.8)
1989–90	3,864,496	939,473 (24.3)	421,483 (10.9)

(Figures in parentheses show percent of all individual gifts for those institutions providing complete information; 996 in 1990)

Deferred Gifts. Table 9 also presents data on deferred gifts for the last decade and Appendix Table A provides data by type of institution.

Matching Gifts. The share of corporate support received from businesses through employee matching-gift programs held steady in 1990 (8.9 percent of corporate support compared to 8.8 percent in 1989), and the average match rose from $279 to $285 (see Table 10). Colleges and universities reported receiving $144.8 million in matching gifts in 1990; when the Council first began tracking these data in 1966-67, matching gifts amounted to $4.2 million, just 2 percent of all corporate giving.

- Matching-gift dollars are particularly important to the private liberal arts institutions, accounting for 31.5 percent of corporate grants in 1990. Corporate matching dollars are more substantial at private institutions since they are driven by individual gifts, which historically have been much greater at private institutions. However, corporate matching dollars will gain significance at public institutions as this difference continues to diminish.

Gifts of company products. These gifts were up sharply at $243.2 million (compared to $182.5 million in 1989), after having fallen or remained flat for three years. Details by type of institution can be found in Appendix Table A.

Total All Institutions	995	$1,628,703	21.5	$144,752	8.9	$145,479	$285

* *Because many companies match gifts at a ratio of $2 or sometimes $3 for every employee dollar, the average match is estimated to be about half again as much as the employee's gift.*

Corporate property gifts. These gifts, usually large, nonrecurring contributions of land, buildings, and equipment, dropped by $6.6 million in 1990 to $66.5 million, after dropping $30 million to $73.1 million in 1989. Details by type of institution can be found in Appendix Table A.

Other property gifts. These gifts come primarily from individuals; they include gifts of land, houses, paintings, antiques and rare books. In 1990 the total reported value of these gifts was $275.5 million, down $20 million from 1989, which was up $92 million over 1988.

Size of Gifts

Many of the institutions participating in the survey provide details about gifts for current operations from individuals that were under $5,000, or $5,000 and over. Table 11 shows the totals and average gifts by type of institution. The average gift under $5,000 was $121 in 1990, versus $118 in 1989 — an increase of 2.5 percent. The average gift over $4,999 was $21,668 in 1990, versus $20,423 in 1989 — an increase of 6 percent.

- In general, the growth in individual giving during the past 20 years has been more a function of greater numbers of contributors than of larger gifts on average. Referring again to Professor Bristol's work on alumni giving projections (see the National Estimates section), since the 1950s, the growth in alumni contributions correlates rather well with the growth in the alumni base. Average alumni gift size in constant dollars, on the other hand, has hardly changed. This is not surprising when one considers both the low average age of the alumni base during this period and the generally poor performance of the stock market. And the factors explaining alumni giving largely hold also for other individuals.

Information on the largest gifts is also collected in the survey. Institutions are asked to report their three largest gifts from living individuals, bequests, foundations and corporations. In 1990, as in earlier years, these relatively few large gifts are of crucial importance. For the 617 institutions supplying complete information:

- These 12 largest gifts combined accounted for 29% of the total contributions received by these institutions. From each source (percent of total contribution):

— living individuals:	9%
— bequests:	7%
— corporations:	5%
— foundations:	8%

- The single largest reported gift in 1990 was $20 million, from a foundation.

Alumni Giving

To facilitate analysis of alumni fund raising, colleges and universities report additional data on the number of alumni of record, the number actually solicited, and the number making a gift. These data are used to calculate the percentage of donors relative to the number actually asked for support — the "solicitation-effectiveness ratio" — and average alumni gift size (see Tables 12 and 13, and Appendix Table A).

Trustee Giving

The average gift from a governing board member or trustee in 1990 was about $15,000, up from about $10,000 in 1984. Contributions from trustees have typically accounted for about 15% of gifts from all individuals during the past 7 years.

Elementary and Secondary Schools

INDEPENDENT SCHOOLS

Voluntary Support Overall

- 500 private independent schools provided usable responses to the 1990 survey of Voluntary Support of Education. A breakdown of total reported support by type of program and student body is shown in Table 14.

- Figure 17 displays average voluntary support per school for the last 20 years in both current and constant 1990 dollars. As was the case for higher education support, the factors influencing overall giving become more apparent when gifts for current operations and capital purposes are viewed separately.

- Figures 18 and 19 show percentage increases in average school support for current operations and for capital purposes over 1971 averages (constant dollars). Comparable higher education trends are also shown, as are trends in the Gross National Product (which correlates well with support for current operations) and the New York Stock Exchange Index (which is a good predictor of support for capital purposes).

- As can be seen, the increases in giving to independent schools for both current operations and capital purposes have failed to keep pace with the increases in giving to higher education. It is on the capital purposes side, however, that the disparity is most marked. At least two underlying developments have probably contributed to higher education's greater growth per institution:
  - Increased enrollments at higher education institutions generally have been followed by increased corporate and foundation support, helping average support per institution to climb during this period. However, on a

Table 14

Total Support by Type of Independent School, 1990

Type of School	Girls	Boys	Coeducational	Total
Day Elementary	$ 810,453 (1)	$ 4,255,999 (3)	$ 22,228,354 (65)	$ 27,294,806 (69)
Day Elementary/ Secondary	25,889.241 (33)	22,113,804 (12)	110,705,520 (147)	158,708,565 (192)
Day Secondary	8,254,112 (9)	14,932,233 (13)	20,515,266 (37)	43,701,611 (59)

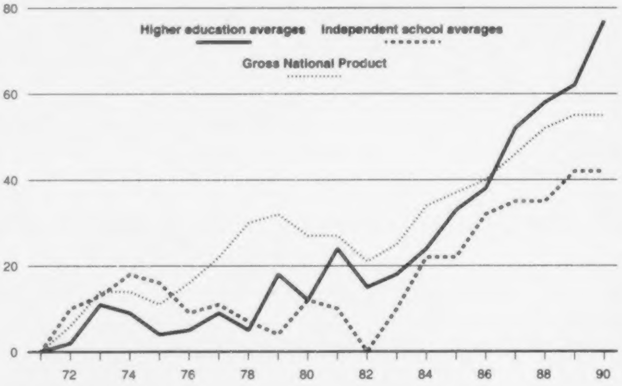

Figure 19

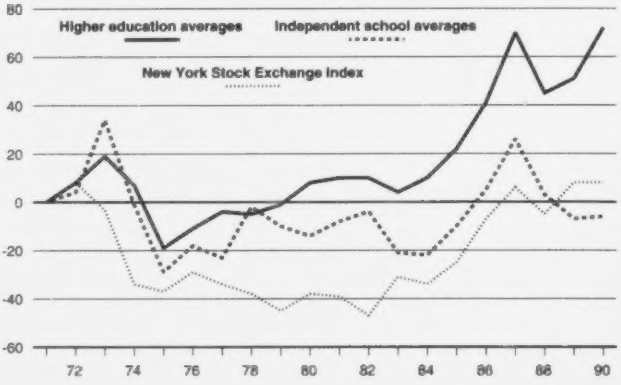
Voluntary Support for Capital Purposes Independent Schools vs Higher Education

Percent increase over 1971 amount (constant $)



per student basis (see Figures 12 through 16), constant dollar support at private institutions of higher education is little changed from 20 years ago. Per student support in constant dollars has also remained fairly steady at independent schools, but without increased enrollments per school, per school averages are also little changed, unlike the higher education per-institution averages.

- Increased college and university enrollments have naturally led to an increase in the size of the alumni pool. As a consequence, there has been substantial growth in overall alumni contributions even though the size of the average alumni gift, in constant dollars, has fallen. The average alumni gift (constant dollars) to higher education today is about 10 percent less than in 1971.
- It is important to keep in mind that these trends are indicative only of what participating schools are experiencing in the aggregate.

Sources of Support

▬ Table 15 presents survey results by source of support (see Appendix Table D for a breakdown of support by both source and type of school). Since the number of survey participants varies from year to year, two types of analysis are used to show changes over time.

- Comparing averages per institution from year to year corrects for different numbers of respondents each year, but can be misleading if the samples for each year differ on important dimensions. And comparing results for just those institutions participating in consecutive surveys — a "core" group — corrects for sampling changes from one year to the next, but produces a smaller set of institutions that may be less representative of all independent schools.
- The sizable differences between these two measures of change in 1990 seem to reflect the fact that a disproportionate number of schools tending to receive smaller amounts of support simply did not participate in 1990. The "real" change for all independent schools probably lies somewhere in between the two measures of change.

▬ Further clouding the support picture for independent schools have been wide swings in support from the different source groups over at least the past three years. Three years of survey results are presented in Table 15 to show these swings more clearly.

- Based on averages per institution, gifts from alumni, after climbing 14 percent in 1989, rose less than 4 percent in 1990. Conversely, gifts from parents rose less than 3 percent in 1989 but climbed 16 percent in 1990. And gifts from other individuals rose 12.5 percent in 1989 (two extraordinary gifts to two schools in 1988 totalling $32 million have been removed from the analysis to make overall results more comparable) and only about 6.5 percent in 1990.
- Foundation grants, which fell 12 percent in 1989, rose 8 percent in 1990. Gifts from corporations, up a strong 22 percent in 1989, fell about 9.5 percent in 1990. Donations from religious organizations, up 37 percent in 1989, dropped 25 percent in 1990. Finally, contributions from other organizations (clubs, special fund raising events, etc.), up by 55 percent in 1989, fell by 22 percent in 1990.

(Figures in parentheses show percent of total in each column.)

** $32 million in two extraordinary gifts to two schools has been removed from the 1988 amount.*

What is noteworthy about the recent support trends depicted in this table?

- First, with average support in 1990 up 14.6 percent overall since 1988, and inflation up about 10 percent during the same period, schools in general appear to be staying ahead of inflation, but not by much.
- Second, giving by individuals shows robust growth over the two year period, averaging about 9 percent per year.
- Third, among organizational sources, foundation giving alone shows a decline during this period. The drop in foundation giving may be an anomaly, or it may reflect increased foundation concern for public elementary and secondary education. Corporations may also have shifted dollars to public school reform, but since much corporate giving to independent schools is in the form of matching gifts, which are driven by individual employees, corporations have less freedom to redirect precollege dollars.

Purposes of Support

Table 16 displays changes in the purposes of gifts as restricted by donors. Contributions for current operations rose (as they have for the past few years), but only by about 4 percent, not enough to keep pace with inflation. In 1989 the increase was well over 10 percent. As seen in Figure 18, gifts for current operations have been on a fairly steady upward climb since 1983, with a few pauses along the way.

Contributions for capital purposes — buildings, equipment, endowment, and loan funds — rose less than 3 percent following a 1989 increase of about 6 percent (with the $32 million in two extraordinary gifts excluded from the 1988 figure). As Figure 19 shows, gifts for capital purposes have fared poorly during the past 20 years, and in constant dollar terms are now barely above the 1971 level. In fact, these gifts followed the fortunes of the stock market quite closely through 1988. But gifts for capital purposes to independent schools have not shown a recovery during the past 2 years comparable to the recovery seen in such gifts to higher education.

Table 17 (over) shows the purposes designated by specific donor groups.

Special Forms of Giving

Combined proceeds from *bequests and deferred gifts* (such as trusts, pooled income finds, and annuities) rose 12.5 percent in 1990. Bequests for current operations rose 72 percent, from $5.6 millions in 1989 to $9.6 million in 1990. Bequests for capital purposes rose 13 percent, from $24.7 million to $27.9 million. Income from deferred gifts fell 16 percent to $10.1 million from $12.1 million in 1989 (see Appendix Table D for details by type of school).

No. Schools Reporting	516		494			405

(Figures in parentheses show percent of total in each column.)

- *Matching gifts* to private independent schools accounted for 45.9 percent of the total $18.2 million in corporate support, up from a 35 percent share in 1989. Matching gifts totaled $8.3 million, up from $7.5 million last year, and the average match, at $451, was up significantly from $393 in 1989.

- *Gifts of company products and other property,* after rising sharply in 1989, fell in 1990. The value of company products totalled about $379,000 and the value of other company property totalled roughly $316,000. Together, product and property gifts comprised 4 percent (about $695,000) of the corporate total of $18.2 million — down from 7.2 percent in 1989, but similar to 1988.

- *Property gifts from noncorporate sources* (which includes real and personal property such as land, houses, paintings, antiques, and rare books) have declined from $6.7 million in 1988 to $5.3 million in 1989 and to $5 million in 1990.

Alumni Giving

- Data on alumni giving for all purposes and for current operations by type of school are presented in Appendix Table D. Overall solicitation effectiveness (donors as a percentage of those solicited), at 30.1 percent, is similar to earlier years. Among the various types of schools, the boarding and boarding/day schools were most effective at alumni solicitation, reporting donations from 34.7 percent of alumni contacted. Day elementary schools had the lowest solicitation effectiveness rate, at 14.2 percent; all other types of schools reported rates close to 30 percent.

- The average alumni gift rose to $466 from $450 in 1989, which was up from $405 in 1988. The average gift for current operations, at $193, was essentially unchanged from $191 in 1989, which had been up sharply from $174 in 1988.

Supplementary Data

- To facilitate studies of fund raising effectiveness, schools were asked for additional information on enrollment, endowment, total educational expenditures, and advancement-program expenses. Table 18 presents advancement-program expenses as a percentage of school expenditures and of total voluntary support by type of school. For all schools reporting these data, fund raising expenses in 1990 were 4 percent of school expenditures (unchanged from 1989) and 18.2 percent of total giving (up slightly from 1989).

- Data on total endowment and endowment per student by type of school are shown in Table 19.

CATHOLIC SCHOOLS

A special grant to the Council for Aid to Education in late fall of 1990 funded a trial mailing of the survey to 1,300 Catholic schools. With only 31 usable responses returned, the results presented in Table 20 are simply indicative of some portion of the range of fund raising results for these 1,300 schools. A more intensive effort to encourage participation is under way for 1991, with the close cooperation of the National Catholic Education Association.

Technical Notes/Participation Tables

The Voluntary Support of Education survey is designed to obtain information on the amounts, sources, and purposes of private gifts, grants and bequests received by educational institutions. Voluntary support excludes income from endowment and other invested funds, support received from federal, state, and local governments and their agencies, and contract research.

The 1990 survey collected data on funds raised from private sources for the fiscal year beginning July 1, 1989 and ending June 30, 1990. Questionnaires were mailed to roughly 2,800 colleges and universities, 1,000 independent elementary and secondary schools, and — on a trial basis — to 1,300 secondary Catholic schools. College and university participation, at 1,056, was about 7 percent below recent levels. Independent school participation was comparably down.

In no year since the survey was begun in 1954-55 have as many as half of the institutions of higher education responded. In recent years, the actual response has numbered between 1,000 and 1,200 colleges and universities out of the 2,800 invited to participate. Despite yearly changes in both size and composition of the group of institutions participating, the Council estimates that the amounts reported have averaged about 85 percent of the total voluntary support received by all colleges and universities (an estimate confirmed again in 1989 with a follow-up survey to non-respondents.)

Survey participation varies greatly by type and control of institution. The composition of the 1990 sample is shown in Table A. Further details on participation are provided in Table B.

About the Council for Aid to Education

The Council for Aid to Education, Inc., is a tax-exempt, not-for-profit corporation dedicated to promoting an effective partnership between business and education in the task of improving America's educational system.

Founded in 1952 by the chairmen of Standard Oil Company of New Jersey (Exxon), General Motors, and U.S. Steel (USX Corporation), the Council was originally designed to encourage private-sector support of higher education. Today the Council has expanded its mission to include primary and secondary education and to encourage more effective — not simply greater — corporate support of education. Its job is to help ensure that business investments in education produce results.

The Council is supported in the main by business, as well as originally and again recently by foundations. Working directly with business to target key areas of educational concern, the Council helps point corporations toward the issues and opportunities in which they have a compelling interest and on which they can have an impact. It alerts them to emerging educational challenges and their strategic implications. It provides information on promising approaches to educational improvement. And it offers detailed advice on how to make effective contributions to the quality of American education.

The Council's current agenda of research, consulting, publication, and advertising has been shaped by the corporate community's recognition that education has to assume as important a place in company planning as production, marketing, and research — but that education is often an area where corporations lack the experience necessary to ensure a full return on their investments. The Council stands ready to extend expert assistance to corporations in all their education-support efforts.

Foreword

Several changes mark this 31st edition of Voluntary Support of Education, changes designed to make the report more useful to educational institutions and funding sources alike.

- In the National Estimates section, trends in giving to higher education in relation to enrollment and expenditures are now reported for four-year and two-year institutions separately. Given the large differences in support, enrollment and expenditures for these two types of higher education institutions, a more meaningful picture of support for these two groups emerges when they are viewed separately.
- Annual survey results are placed more clearly in their historical contexts. The report now includes more charts showing trends over time.
- Aggregate public/private comparisons (e.g., average support per institution for all four-year public and all four-year private institutions) have largely been eliminated. Such comparisons can lead to misunderstandings because the mix of institutional categories (research/doctoral, comprehensive, etc.) on the public and private sides greatly differ. Public/private comparisons are better made only within a given institutional category, and even then cautiously because of the wide range of institutions existing within categories.
- The report is now published in two volumes:

  Volume 1 — ***National Estimates and Survey Summary*** contains an extensive analysis of the results of the year's survey in a multi-decade context. Volume 1 contains no institution-specific information. Volume 1 is distributed on a complimentary basis to all survey participants, to other institutions that are being encouraged to begin participating in the survey, and to a large number of companies and foundations.

  Volume 2 — ***Detailed Survey Results by Institution*** contains extensive information on the amounts and types of voluntary support received by each college, university, and elementary and secondary school participating in the survey. Volume 2 is available from the Council for Aid to Education at $35 prepaid per copy for survey participants and $50 prepaid per copy for all others. (A copy of Volume 1 is always included with a purchase of Volume 2.) Volume 2 is being mailed this year on a complimentary basis to institutions being encouraged to begin participating in the survey. It is always mailed on a complimentary basis to Council corporate and foundation supporters.
- The detailed, institution-specific information shown in Volume 2 is a small portion of all the support information provided by each institution. All information, on machine-readable media, is available from the Council for Aid to Education. The Council maintains a database of higher education voluntary support survey information covering the years from 1969 forward. Queries regarding the purchase of these data should be directed to the Council.

Changes in the annual survey process and the content of the report will continue for the next several years. The Council welcomes comments on changes described above or suggestions for additional changes. Please address comments and suggestions to: David R. Morgan, Director of Research.

Volume 2: Detailed Survey Results by Institution

Colleges and Universities

Research/Doctoral Institutions: The Carnegie Foundation for the Advancement of Teaching identifies four categories of universities ("Research I and II," "Doctorate-Granting I and II"), classified by the amounts of federal research support received and numbers of Ph.D. degrees awarded each year. The four are combined in this report.

Research/Doctoral Institutions — Public 2
Research/Doctoral Institutions — Private 6

Comprehensive Institutions: There are two Carnegie categories of these colleges and universities offering bachelor's degrees (half in professional or occupational disciplines) and usually master's degrees as well. Category I enrolls more than 2,500 students; II between 1,500 and 2,500. The two are combined.

Comprehensive Institutions — Public 8
Comprehensive Institutions — Private 14

Liberal Arts Institutions: Two categories of primarily undergraduate colleges (one more selective than the other) that award more than half of their bachelor's degrees in arts and science fields. The two are combined.

Liberal Arts Institutions — Public 20
Liberal Arts Institutions — Private 20

Professional and Specialized Institutions: These are baccalaureate and postbaccalaureate institutions with programmatic emphasis in a single specialized field such as business, theology, engineering, law, medicine, art.

Professional and Specialized Institutions — Public 30
Professional and Specialized Institutions — Private 32

Two-Year Institutions: These community, junior and technical colleges offer certificate and degree programs through the Associate of Arts level and with few exceptions do not offer the baccalaureate degree.

Two-Year Institutions — Public 34
Two-Year Institutions — Private 38

Elementary and Secondary Schools

Independent Schools: Private, not-for-profit elementary and secondary schools that do not receive tax or church money and are each independently governed by a board of trustees. *40*

Catholic Secondary Schools: These schools differ from Catholic schools listed under the Independent School heading in that they are not independently governed, but are part of a larger Catholic school system — parish, inter-parish or diocesan. *58*

Technical Note and Participation Tables *60*

Technical Note

The Voluntary Support of Education survey is designed to obtain information on the amounts, sources, and purposes of private gifts, grants and bequests received by educational institutions. Voluntary support excludes income from endowment and other invested funds, support received from federal, state, and local governments and their agencies, and contract research.

The 1990 survey collected data on funds raised from private sources for the fiscal year beginning July 1, 1989 and ending June 30, 1990. Questionnaires were mailed to roughly 2,700 colleges and universities, 1,000 independent elementary and secondary schools, and — on a test basis — 1,300 secondary Catholic schools. College and university participation, at 1,056, was about 7 percent below recent levels. Independent school participation was comparably down.

In no year since the survey was begun in 1954-55 have as many as half of the institutions of higher education responded. In recent years, the actual response has numbered between 1,000 and 1,200 colleges and universities out of the 2,800 invited to participate. Despite yearly changes in both size and composition of the group of institutions participating, the Council estimates that the amounts reported have averaged about 85 percent of the total voluntary support received by all colleges and universities (an estimate confirmed again in 1989 with a follow-up survey to non-respondents.) Survey participation varies greatly by type and control of institution. The composition of the 1990 sample is shown in Table A.

Further details on participation are provided in Table B.

Table C provides data on those institutions that reported too late for tabulation or that reported a Grand Total figure only.

Notes on Detailed Survey Results by Institution

Significance of Large Gifts to Higher Education

Column 29 in the College and University listing shows the sum of 12 large gifts (the three largest gifts received from living individuals, from bequests, from corporations, and from foundations) as a percent of total support received (column 1). The column is left blank if the institution did not provide large gift data.

Large gift data are not provided by elementary and secondary schools.

Educational and General Expenditures

Column 26 does not show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

Endowment: Market Value

When an institution leaves the Endowment field on their survey form blank, it is often impossible to determine whether they mean zero (0) or NA. Even if the endowment figure for an institution is listed as zero (0), the institution may be endowed, but have been unable to report a figure at the time of the survey.

NA signifies Not Available or Not Applicable.

The Sponsoring Institutions

The Council for Aid to Education, Inc. is a not-for-profit corporation dedicated to promoting an effective partnership between business and education in the task of improving America's educational system. Based in New York City and funded by contributions from business and foundations, the Council works directly with business to target key areas of educational concern, identify opportunities for corporate involvement in education, and provide detailed advice on how to conduct effective programs in support of education. The Council's activities include research, consulting, publishing, and conducting workshops and seminars.

The Council for Advancement and Support of Education (CASE) is a professional educational association with 2,850 institutional members which offers programs of professional development and acts as a public affairs arm for U.S. education. Participants in its programs include fundraisers, alumni administrators, communicators, government relations officers, and the managers of these functions in postsecondary and secondary institutions. CASE is headquartered in Washington, DC.

The National Association of Independent Schools (NAIS), Boston, is a nonprofit voluntary membership association of nearly 1,000 schools in the U.S. and overseas serving a total enrollment of 355,000 students. Its administrative and academic services to member schools include research reports, periodicals, and manuals; an employment clearinghouse for school administrators; and leadership and professional development for teachers, administrators, and school trustees.
